

SHRUTIK GUPTA

Phone: +918928320853

Location: Mumbai, Maharashtra

Email: shrutikgupta07@gmail.com

Portfolio: shrutik.online

LinkedIn: linkedin.com/in/shrutik-gupta/

GitHub: github.com/shrutik-gupta

EDUCATION

Thadomal Shahani Engineering College

2022 – 2026

B.E (Information Technology Engineering) – 9.32 / 10

Mumbai, Maharashtra

SKILLS

Programming Languages: C++, Python, Javascript

Cloud: AWS (Lambda, S3, SQS, Amplify)

AI / ML: LangChain, LangGraph, RAG Pipelines, Embeddings

Web & APIs: REST APIs, Node.js, React, BeautifulSoup

Databases: DynamoDB, MongoDB, MySQL

Tools: Git, GitHub, Postman

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, DBMS, REST API Development

EXPERIENCE

One Click Designer – Junior Software Developer

May 2026 – Present

- Developed scalable Node.js + Express APIs on AWS Lambda with <85ms avg and <150ms P95 latency, backed by DynamoDB; integrated bundle payments, S3 asset management, and AWS SES + Mailchimp.
- Architected text-template engine (S3 → SQS → Render engine), automating text replacement in AE files along with current templates with media replacement.
- Established sports-pack template logic and credit-bundle payment flows in DynamoDB/Express, supporting atomic transactions across 5000+ templates and 1,000s of live renders.
- Developed the AI job creation and status-polling APIs, implementing continuous frontend/backend sync to track EC2 progress, handle timeouts, and render 8 parallel generator outputs.
- Remediated critical security vulnerabilities by securing 15+ admin-only endpoints with verifyAdmin middleware and implemented per-route rate limiting across authentication, OTP, payment, and render APIs, reducing abuse risk across 25+ endpoints.
- Engineered an admin dashboard with real-time INR/USD exchange-rate conversions, tracking conversion rates, user drop-offs across 9+ funnel steps, and daily render performance across 1000s of templates.

Seoulx Technologies – MERN Developer Intern

July 2025 – October 2025

- Programmed and maintained scalable Employee Celebration platform for Mystery Rooms India following modular architecture and reusable component design, improving load time by ~40%
- Collaborated with client stakeholders to understand requirements. Automated notification workflows across multiple channels.

PROJECTS

[GitHub] MindQueue – Multi-Agent AI Research System

April 2026

(Python · LangChain · Tavily API · BeautifulSoup · Streamlit · MistralAI)

- Built a 4-agent AI system (Search, Reader, Writer, Critic) to automate end-to-end research workflows, generating structured reports with 90%+ content coherence using LLMs
- Integrated 2 external tools (Tavily API, BeautifulSoup) to process 10+ real-time web sources per query, enabling real time data retrieval and improving research relevance.

[Deployed] GeWoDo – Scalable AI Platform for Home Services Marketplace

October 2025 – January 2026

(Node.js · Ollama – Llama 3.2 · React · MongoDB Change Streams)

- Engineered a dual-portal marketplace for service professionals and clients, featuring a real-time bidding engine with AI agent, automated role-based dashboards. Used modular and reusable code patterns to ensure maintainability and extensibility
- Implemented a server-side facial recognition system achieving 95%+ identity verification accuracy. Built an adaptive Certification Center that generates personalized training modules and AI-evaluated assessments to validate professional expertise.

ACHIEVEMENTS

Ambassador Award for Information Technology Department, TSEC

March 2026

Runner-Up, JP Morgan Chase's code for <good> Hackathon 2025

June 2025

Runner-Up, Hackwatts Hackathon'24, SLRTCE

October 2024

CO/EXTRA-CURRICULAR ACTIVITIES

IETE-TSEC – Publicity Head & Publicity-SMM Executive

July 2023 – March 2025

- Led a cross-functional team of 44 members in organizing events, ensuring timely task completion, maintaining overall event quality.
- Managed publicity and SMM for events, engaging with audiences of 1,500+ at major campus events.

CERTIFICATIONS

[Certificate] Introduction to Agile Development and Scrum – IBM

March 2026

[Certificate] Supervised Machine Learning: Regression and Classification – DeepLearning.AI

August 2024
