SUMMARY

Final-year IT student with full-stack development experience, building scalable systems using MERN and AI integrations. Currently exploring Retrieval-Augmented Generation (RAG) and Agentic AI to develop intelligent, context-aware systems.

EDUCATION

Thadomal Shahani Engineering College

November 2022 – Present

B.E (Information Technology Engineering) – 9.30 / 10

Mumbai, Maharashtra

SKILLS

Programming Languages: C++, Python, Javascript

Cloud: AWS (EC2 – basic exposure)

AI / ML: LangChain, LangGraph, RAG Pipelines, Embeddings

Web & APIs: REST APIs, Node.js, React, BeautifulSoup

Databases: MySQL, MongoDB, PineCone

Tools: Git, GitHub, Postman

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, DBMS, REST API Development

EXPERIENCE

[Certificate] Seoulix Technologies – MERN Developer Intern

July 2025 – October 2025

- Programmed and maintained scalable full stack applications following modular architecture and reusable component design, improving load time by ~40%
- Collaborated with client stakeholders to understand requirements. Automated notification workflows across multiple channels.

PROJECTS

[GitHub] MindQueue – Multi-Agent AI Research System

April 2026

(Python · LangChain · Tavily API · BeautifulSoup · Streamlit · OpenAI)

- Built a 4-agent AI system (Search, Reader, Writer, Critic) to automate end-to-end research workflows, generating structured reports with 90%+ content coherence using LLMs
- Integrated 2 external tools (Tavily API, BeautifulSoup) to process 10+ real-time web sources per query, enabling real time data retrieval and improving research relevance.

[Deployed] GeWoDo – Scalable AI Platform for Home Services Marketplace

October 2025 – January 2026

(Node.js · Ollama – Llama 3.2 · React · MongoDB Change Streams)

- Engineered a dual-portal marketplace for service professionals and clients, featuring a real-time bidding engine with AI agent, automated role-based dashboards. Used modular and reusable code patterns to ensure maintainability and extensibility
- Implemented a server-side facial recognition system achieving 95%+ identity verification accuracy. Built an adaptive Certification Center that generates personalized training modules and AI-evaluated assessments to validate professional expertise.

[GitHub] Rakshak – AI-Powered Real-Time Urban Safety & Crime Visualization System

October 2024

(Node.js · Gemini AI · FaceAPI · React · MongoDB)

- Created a real-time safety platform featuring a dual-interface dashboard that visualizes 3,000+ web-scraped criminal incidents across India using interactive heat maps and geospatial route categorization.
- Integrated Gemini AI to automate the validation of user-submitted complaints, reducing misinformation by cross-referencing descriptions with uploaded imagery for 100% consistency checks.

ACHIEVEMENTS

Ambassador Award for Information Technology Department, TSEC

March 2026

Runner-Up, JP Morgan Chase’s code for <good> Hackathon 2025

June 2025

Runner-Up, Hackwatts Hackathon’24, SLRTCE

October 2024

CO/EXTRA-CURRICULAR ACTIVITIES

NSS-TSEC – Volunteer

July 2024 – March 2025

- Collected 200+ bags of trash in beach cleanups, raising awareness among 300+ citizens concerning environmental responsibility.
- Championed three community service programs, including a tree plantation drive that resulted in planting 500 trees.

IETE-TSEC – Publicity Head & Publicity-SMM Executive

July 2023 – March 2025

- Led a cross-functional team of 44 members in organizing events, ensuring timely task completion, maintaining overall event quality.
- Managed publicity and SMM for events, engaging with audiences of 1,500+ at major campus events.

CERTIFICATIONS

[Certificate] Introduction to Agile Development and Scrum – IBM

March 2026

[Certificate] Supervised Machine Learning: Regression and Classification – DeepLearning.AI

August 2024
